

2. Choose **Mail, Contacts, Calendars** and click **Add Account**:

3. Choose **Other** from the list that appears:

5. Select protocol type: **IMAP**

6. Settings for both **IMAP**

- **Name, Address and Description:** should have been already filled in
- **Host name:** **w3cloud.qa**
- **User Name:** your email address
- **Password:** password for your email
- In the fields for both **Incoming Mail Server** and **Outgoing Mail Server**, indicate the following settings:
- Click **Next**.

Cancel	New Account	Next
------------------------	--------------------	----------------------

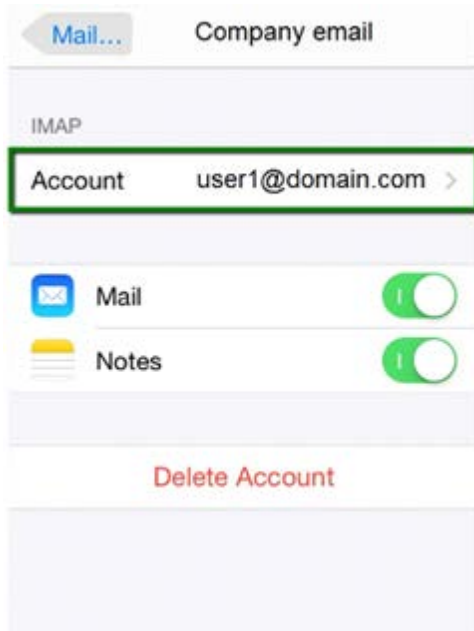

<input checked="" type="radio"/>	IMAP
<input type="radio"/>	POP

Name	user1
Email	user1@domain.com
Description	Company email

INCOMING MAIL SERVER	
Host Name	w3i.cloud
User Name	user1@domain.com
Password	●●●●●●●●●●●●●●●●

8. When the checks are finished, you'll be redirected to the **Mail, Contacts, Calendars** screen. Choose your newly created account there:

9. Scroll down and select **Advanced**:
